JO Steenkamp - Sculptor

JOS® Bio & Artist Statement:

Born & raised within the diverse landscapes of South Africa, JO Steenkamp entered the sculpting arena at the age of 16. Synchronistic events led to the start of a fulltime clinical psychology private practice in 1985. His significant contributions as a psychotherapist with his continued development of the psychotherapy SHIP® (Spontaneous Healing Intra-systemic Process), in which he obtained his doctorate in 1991, & as author of 5 books, caused him to take a 22 year break from sculpting in clay. JO's work as a psychologist reflects a tapping into the wisdom of internal regulation of psychobiological dis-eases, the spontaneous healing of trauma, psychobiological wellness & transformation. He has also authored & co-authored international published articles, & has been a speaker/facilitator at numerous national & international gatherings (academic institutions, public & business forums, conferences, radio & TV talk shows, & international dialogue).

**Deep within a primordial spirit yearns.
Our responsibility is to not compromise.
To birth its voice into life is also a discovery that answers
the, "Why?"**

When JO took up sculpting again in April 2021, his art retained its original characteristic of spontaneous potentiality flow, though it now merged with a deeper understanding of the psychology of being.

“This journey of mine through various conscious-unconscious forests, & into the Void where the Spirit of No-thing configures Itself, resulted in a **“Coming Home”, of finding self & living life**. It took 50 years to reach full circle, free from acquired beliefs, where every tomorrow remains a gratitude.

All manifestation is spirit, every configuration has a face. During sculpting, external boundaries fade & my hands become my spirit connection with the faces I meet within the clay. This co-creation & unique emergence through connection, reflects Life as One continuous interaction within Itself. Some of the potentialities that manifest into face-shifting configurations, collapse into reality, where others are taken up again & await to be reincarnated into new possibilities.”

With JO's focus on the **creative spirit of relational exchange** he blurs the lines. In its essence this dance of connectedness with the external world functions as a spontaneous shape-shifting field of possibilities & during the confluence, between the onlooker & the JOS® Sculptures, we are exposed to a subtle peek into the mystery of all of us.

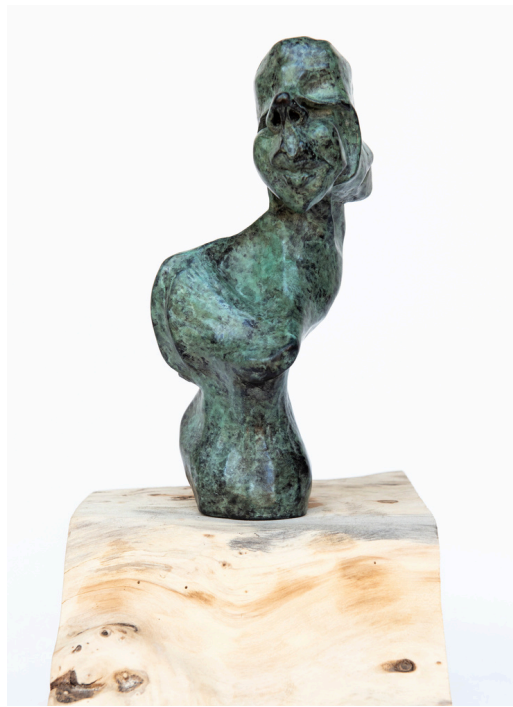

Only one of each Sculpture is casted in bronze (Original) - once casted the mould is destroyed, ensuring the uniqueness & value of each bronze piece.
